Storage temperatures < 0°C require a thawing phase before use.

Application:

Accelerator 11 is applied in the 2nd shot or used in the co-spray method of SIMALFA® 1K+ or SIMALFA® 2K.

Important notice:

The usual precautionary measures have to be taken, the same as when handling chemical products. This includes a well ventilated working place, particularly when larger quantities are processed. For technical data see according safety data sheet. The particulars on this data sheet are based on our present knowledge and experience. Of course each user has to make his own tests when using our products. Our data sheet cannot be considered legally binding in the case of certain material or suitability for all applications. Rules and legislation in each country have to be taken into consideration and we cannot be held responsible for local regulations unknown to us. In the case of inconsistencies between different translations, the German version shall prevail.
